

Dr. Berke,

Thank you for all of the help that came with the reshaping contact lenses, they have made my life so much easier. I no longer have to worry about falling asleep with my glasses on, and then breaking them because of that. Also I can do several outdoor activities with the ability to see everything perfectly, a few of the following outdoor activities include go-karting and ATVing, there are also so many more that I can't name at the moment. But, again thank you so much for the ability to have perfect eyes without the worry of losing a contact or breaking my glasses and being able to do everything that my other friends do.

Sincerely,
Aaron Lee
