

As a large animal veterinarian, soft contact lenses did not work for me. The dirt and dust in the environment made them very irritating. Glasses also were cumbersome. Always dirty from the dust and getting knocked off routinely was not only annoying, but resulted in a few costly repairs. I had inquired with DR. Berke about LASIK. The problem was it was not without risk and was irreversible. Dr. Berke recommended his Ortho-K lens. Worn overnight, I did not have the irritation of the dirt and dust from outside, no more glasses, and no surgery. My vision is better than ever and life is simple. I wear them 5 nights a week but have perfect vision everyday without wearing any lens during the day. And when my vision changes, a change in the lens adjusts my eyes and I am good to go. I have had the Berke lens since 2006 and will happily wear them for many more to come.

A handwritten signature in blue ink, appearing to read 'D.H. Grove', with a long, sweeping underline that extends to the right.

Daniel H. Grove, D.V.M.
