The BEST OPTOMETRY PRACTICE in Orange County.

Three factors make Super Vision superior to any other optometry center:

1. Dr. William Berke.

Dr. Berke is the most skillful optometrist in Orange County. I have a very unique vision problem and my ophthalmologist in Newport Beach felt Dr. Berke was the only optometrist skilled enough to address my needs. As a fellow physician, I found Dr. Berke extremely knowledgeable and personable. His explanations are clear. His humor makes the visit a joy.

2. The lab.

The lens are made right there. It's more than just quick and convenient. They can really customize your glasses just for you.

3. The fashionistas.

His staff is on top of fashion. For us guys, it's a god send. They have a wonderful way of saying what you like is nice but dated. They have a knack for finding the perfect frame for you.

I recently lost my black framed glasses. I ordered a new pair. Unfortunately or fortunately, I found them. I told the staff and she said it would be a shame to have two pairs that are exactly the same. She offer to pop the lenses and place them with a tortoise shell pair. Within two minutes and without a dime more, I now have two different pairs! I cannot imagine more **OUTSTANDING SERVICE** than I receive at Super Vision!

Super Vision Center is worth the drive!
